

Zoom Keyboard Shortcuts

from the World Institute on Disability

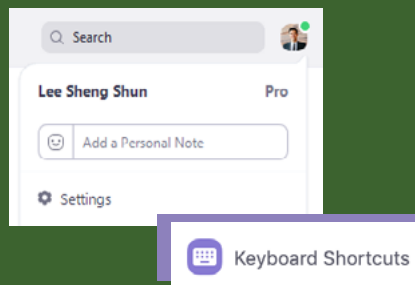

Why are keyboard shortcuts an accessibility tool?

Keyboard shortcuts and navigational tools can be helpful for many people, but for people who may not use a mouse or visually interact with the platform, they are necessary for being able to fully access the meeting tools. This includes people with mobility and dexterity disabilities, people who are blind or low-vision, and more.

View + Edit Shortcuts

You can view and edit keyboard shortcuts in your Accessibility settings.

1. Log in to your Zoom desktop client.
2. Select your profile picture then select Settings.
3. Select Keyboard Shortcuts.
4. Edit a shortcut by selecting the shortcut, then pressing the key that you would like to use.

Some of the shortcuts can be used as global shortcuts, meaning they will work even when Zoom is not in focus. To enable a shortcut globally, check the option next to the shortcut.

Keyboard shortcuts for Windows

Key combination	Action
