TEPLO Special Winter Project

Warming Ukrainians with disabilities through the winter period during the Russian war

**FIGHT
FOR
RIGHT**

Abandoned and invisible, Ukrainians with disabilities are struggling in two wars: the Russian war against Ukraine and discrimination in humanitarian action.

People are fighting independently for their own salvation and preparing for a brutal winter.

**FIGHT
FOR
RIGHT**

Due to active hostilities in Ukraine, a significant part of the gas pipelines were damaged. Gas distribution stations, which provided heating in winter, stopped working. The average winter temperature is -5C in Ukraine. It will be extremely difficult for 2.7 million Ukrainians with disabilities to survive under such conditions during the Russian war.

TEPLO is our chance to warm homes of:

- People with complex types of disabilities
who live in rural areas and are deprived of
gas supply.**

**TEPLO is our chance to warm
homes of:**

**- Single persons with disabilities and
elderly persons in the frontline territories.**

- People with severe types of disabilities who have difficulties with self-care and do not have a stable income and support services from the state.**
