GADRA Partners

GADRA has emerged as a global force in disability inclusive disaster risk reduction with a sustainable locally-led, disability-led, and community building approach that is demonstrating the ability to circumvent the charity model that relies on ongoing external funding streams by building internal resilience beginning in the community sectors who experience the greatest disaster impact, are the most consistently excluded, and are the greatest stewards of scarce resources.

Disability, Technology, and Disaster

Using technology to increase reach, maximize results and accelerate resources.

Our process:

GADRA

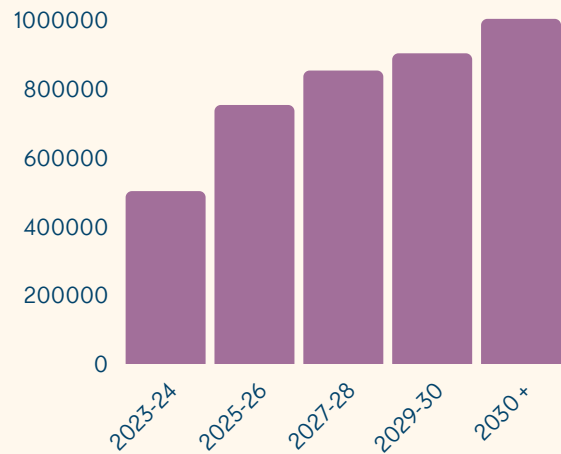

Combining the innovation and resilience of disability-led organizations with accessible technology to change disaster outcomes.

Relationships	Increasing effective communication in disaster	Leveraging our experience to build new networks for DLOs	Sustaining DLO relationships to create a system of support
Technology	Creating accessible shared spaces for communication	Building accessible tools for DLOs to expand their own reach	Connecting DLOs to the globe through accessible mechanisms

GADRA Next 6 Years

Moving beyond helping one DLO at a time through the application of AI technology, streamlined decision-making, and a high-capacity network.

Building on lessons learned and response successes to improve outcomes.

GADRA

Leading the way to disability inclusive, ethical, and accurate AI applications to achieve equity and sustained resilience.

Relationships	A global consortium of disability and disaster experienced leaders	A global DLO & disaster community of practice	A global network of DLOs taking leadership roles
Technology	Bringing DLOs 'to the table' through shared API and information	A cache of tools, trainings, tips, and resources for DLOs	A robust predictive and real-time database
